

Incident report analysis - Rayane Merlin

Instructions

As you continue through this course, you may use this template to record your findings after completing an activity or to take notes on what you've learned about a specific tool or concept. You can also use this chart as a way to practice applying the NIST framework to different situations you encounter.

Summary	
Identify	DoS via ICMP ping flood
Protect	Add a firewall rule to limit incoming ICMP packet rates Deploy an IPS to filter suspicious ICMP traffic Regular audits of networks, devices
Detect	Use network monitoring software and an IDS to detect abnormal traffic patterns Use a SIEM tool to monitor application logs
Respond	Trace the attack (Firewall & Network Logs) Update response plans for future incidents
Recover	Restore network services first, afterwards non-critical services Communicate these information to staff
