Access controls worksheet - Rayane Merlin

	Note(s)	Issue(s)	Recommendation(s)
Authorization /authentication	The payroll event (FAUX_BANK) was added on 10/03/2023 at 8:29:57am by Legal\Administrator from a computer named Up2-NoGud. The IP corresponds to the user Robert Taylor Jr. an old contractor whose contract ended since 27/12/19	*Access wasn't revoked after the employee left. Another problem spotted is every employee (even old ones) has admin access.*	Revoke access automatically *when a contract ends and review accounts regularly.* Furthermore, apply the principle of least privilege. For example, *give admin rights only to roles that need them and restrict payroll changes to finance staff.*
